DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/18/2005 has been entered.

Response to Arguments

Applicant's arguments filed 9/19/05 have been fully considered but they are not persuasive in view of the New Matter rejection below.

Claims 68-84 and new claims 85-90 are now present for examination.

Specification Objection - New Matter

The amendment filed 9/19/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure

Art Unit: 2153

is as follows: automatic storing of video at the consumer locations without consumer selection or using individual consumer preference information.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112 1st paragraph

Claims 68-90 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 68, 80 and newly added claim 85 recites automatic storing the video at the consumer locations without consumer selection or using individual consumer preference information. Applicant cited to page 28 lines 17-24 of the specification for support of this limitation. The examiner disagrees with this assertion. The specification does not support the claims as amended. Page 28 lines 17-24 describe a second example embodiment. This example makes reference to example I and explicitly states that Example II differs from Example I in that Tier 1 movies are transmitted in

Art Unit: 2153

compressed time format. This is the only difference between Example I and Example II. Nothing in the section cited by application discloses storing the movie without consumer selection or using consumer preference. On the contrary, the last sentence on page 28 states "This compressed time transmission ... permits consumers to have movies, particularly Tier 1 movies, available on short notice ..." (emphasize added). This sentence together with the description of Example I clearly show that the storage of movies is still subject to consumer selection/preference; not independent of it as claimed.
